

CMI ENVIRONMENT

AIR & GAS
CMI Europe Environnement

Expert Expert in the treatment of Volatile Organic Compounds: **COV**

CMI Europe Environnement makes available to you the highest performing technologies for controlling **gaseous discharges of VOC** from your processes in **numerous applications**.

Valorisation

ENERGY RECOVERY

(e.g.: heat recovery)

MATERIAL RECOVERY

(e.g.: recovering solvent in liquid form)

Sources and types of gaseous pollutants released while using solvents are manifold: our business is to define and set up the optimal treatment solution, compliant with your expectations and standards.

Thanks to our **know-how** and our **technological master**, CMI Europe Environnement contributes to:

- Protect on site operators
- Control your gaseous releases
- Preserve your working environment: buildings and equipments
- Enhance your image among your neighbors and customers

EXAMPLE OF A RECURRENT CHALLENGE IN PETROCHEMICAL INDUSTRY

- Solvent recovery solutions

CLIENT'S PROCESS: Gas treatment on process vents

- VOC: Heptane
- Air flow: 670 m³/h at 25°C

OUR SOLUTION

- Turnkey skid to recover and to reuse 30 T/year of heptane

VALORISATION : > 98%

EXAMPLE OF A RECURRENT ISSUE IN PHARMACY

- Treatment of process gas
- Solvent recovery solutions

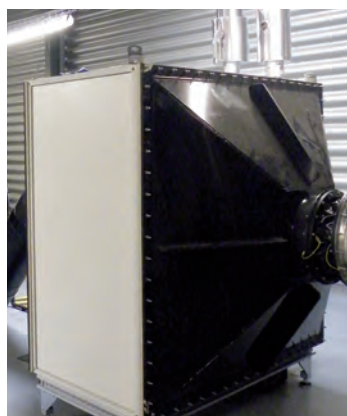

CLIENT'S PROCESS: Solvent recovery unit on pelletizer dryer

- VOC: Ethanol & Isopropanol
- Air flow: 8 000 m³/h at 20°C

OUR TURNKEY SOLUTION:

- Heat exchanger to cool gases
- 2 packing scrubbers
- VOC analyser
- High pressure centrifugal fan
- Ducts & Electrical cabinet

VALORISATION : > 98%
