

CMI ENVIRONMENT

AIR & GAS
CMI Europe Environnement

Ventilation Solution for corrosive, harmful & odorous environments

Ventilation accessories, milling & thermoplastic manufacturing

VENTILATION ACCESSORIES

A wide range of injected accessories or manufactured from Ø 50 mm to Ø 2000 mm.

A wide range of materials:

- Thermoplastics: PVC, PP, PE, PPs, PVDF...
- Electroconductive thermoplastic materials for ATEX applications: PE el, PPs el...

- | | |
|---------------------------|-------------------------|
| • Ventilation ducts/pipes | • End-caps |
| • Flexible connections | • Sockets |
| • Clips/Collars | • Bird protection grids |
| • Bends | • Reducers |
| • Dampers | • Adjustment dampers... |

THERMOPLASTIC MACHINING

Manufacturing of tailor-made pieces following customer's drawings or using a 3-axis digital bench suitable for several industrial applications (chemistry, surface treatment, food processing, mechanical industries...).

- Thermoplastic manufacturing: PVC, PPh, PEHD, PPs, PVDF, polycarbonates...
- Up to 110 mm thickness.
- Tailor-made manufacturing.
- On site mounting on request.

Welding

Flanges, impellers, specific mechanical devices...

OUR SERVICES:

An engineer's office equipped with an Autocad CAD

Always at your disposal,
A qualified team dedicated to select the optimal material according to the pollutants to flow, to treat...

Assembling on demand
