

CMI ENVIRONMENT

AIR & GAS

Expert in Ventilation

in harmful, corrosive & odorous environments

CMI Environment makes available to you the highest performing equipment for **collecting and ducting polluted air** from your processes to the treatment system, and for **ventilating the work stations in numerous applications**, such as:

WATER TREATMENT

SURFACE TREATMENT

LIGHT & HEAVY CHEMISTRY

TREATMENT OF WASTE & COMPOSTING

VARIOUS INDUSTRIES: TANNERIES, ETC.

Industrial processes generate various pollutants: our job is to **optimise ventilation**, in line with your requirements and those of the regulations in force.

Thanks to its **know-how**, CMI Environment helps to:

- Protect the personnel on site
- Control your gaseous releases
- Preserve your working environment: buildings and equipment
- Improve your image with local residents and clients.
